i-CareElder: Integrated Islamic Elderly Care Dashboard

Source code listing

Work: i-CareElder: Integrated Islamic Elderly Care Dashboard (Overview, Try a case, Data blueprint, i-CareElder App), copy for copyright submission. Type: copyright, software / system, TRL 3.

Rules versions: help 2026.10.04, giving 2026.10.07 **Listing made:** 19 October 2026

Owner: Universiti Utara Malaysia

Inventors / authors: Shamzaeffa binti Samsudin (Principal Inventor), Mukhriz Izraf bin Azman Aziz, Shazida Jan binti Mohd Khan, Nur Syakiran Akmal binti Ismail, Sharima Ruwaida binti Abbas, Nur Hafizah binti Mohammad Ismail

Language: HTML, CSS and JavaScript. No build step: the files below run as they are, by opening index.html in a web browser. The Excel workbook (i-CareElder Data Blueprint.xlsx) is data, not code, and is not printed.

This listing prints every source file in full, with line numbers. The SHA-256 value of each file lets anyone check that the printed code is the same as the code in the submitted folder.

File	What it does	Lines	SHA-256
`index.html`	Overview page	176	`4c9638bb5963d3138966ed6328d30918ea2559dc55c77cae3a4b1f0e2e324b35`

Try a case help rules and matching engine (no screen code) · 455 lines

```
/* ============================================================================
   i-CareElder: Try a case, rules version 2026.10.04
   The assistance model and the matching engine. No DOM work here, so the same
   state shape and rules can move to SwiftUI and Android Compose unchanged.

   One case = one person, their situation, and every need they have. The
   engine turns that into an Assistance Profile, then into one Assistance Plan:
   for each need, the possible providers ranked with plain reasons, the steps,
   and what must still be confirmed. Provider abilities are SAMPLE data until
   Phase 1 checks them; the plan never promises help or entitlement.
   ============================================================================ */

Try a case giving rules: ways to give, official routes, volunteer places (no screen code) · 269 lines

```
/* ============================================================================
   i-CareElder: the giving side of Try a case (rules 2026.10.07)
   The i-CareElder framework treats an older person as someone who can also
   give: sadaqah, cash waqf, sponsoring another older person, giving things,
   volunteering, sharing skills and supporting others of the same age.
   This file holds the rules only (no DOM). Money always goes through the
   official page of LZNK, MAIK or the masjid itself; the plan never takes
   money and never shows an account number. Volunteers are pointed to the JKM
   volunteer scheme, the PAWE centres and NGOs in Kedah, as the lead
   researcher asked. The help rules in kse-assist.js are left untouched.

Try a case screens for both sides, case card, plans and print sheets · 935 lines

```
/* ============================================================================
   i-CareElder: Try a case screens (rules 2026.10.03)
   One question per screen for an older person or a helper. A case card fills
   in beside the questions as each answer is given, and the case ends as one
   Assistance Plan. The rules live in kse-assist.js (no DOM); this file only
   draws and listens. The first screen also asks whether the person wants to
   get help or to give (sadaqah, waqf, things or time); the giving rules live
   in kse-give.js and end as one giving plan.
   ============================================================================ */

```
/* ================================================================================
   i-CareElder: visual styles
   Loaded after kse.css, which keeps the layout mechanics of every component.
   This file replaces the whole visual world: an iPhone and iPad app built
   around one older person (Find My grammar), dressed in a warm milk ground,
   a quiet colonnade of round-topped pillars, Instrument Serif large titles,
   SF Pro for everything you read or press, one olive tint and one midnight
   surface. Dark mode is a deep olive, never a plain grey (and not blue). Tokens are
   defined three times (light, prefers dark, data-theme dark): keep all
   three in sync.
   ================================================================================ */

The eight looks · 150 lines

```
/* ========================================================================
   Looks: eight colour and type themes for the whole site, with Malay names.
   Chosen from the round palette button at the top right (kse-shell.js) and
   kept in localStorage as kse-look. Padi is the default and still follows
   the light / dark switch; the others are fixed. No blue anywhere: the
   owner rejected it. All fonts are local files (fonts.css).
   ======================================================================== */
